RESEARCH HIGHLIGHTS

Leading scientific researcher in observational astrophysics of supermassive black holes with a background in instrumentation and teaching. I have supervised 11 Masters Theses and 13 Undergraduate Theses based on data I have taken. Led as principle investigator (PI) 77 successful space, instrumentation, and ground based telescope proposals in the X-ray, UV, optical, NIR, and submillimeter wavelengths with over \$4 million in associated funds for observing, instrumentation, software development, and postdoctoral fellowships. Authored or coauthored 156 refereed papers in astronomy, nuclear physics, and aerospace engineering with over 8500 citations and an H-index of 47. I have been one of the PIs of BASS, a survey leading to more than 40 refereed papers, \$6 million in grants, two American Astronomical Society Special Sessions, and an Astrophysical Journal Special Issue. I have been lead author of NASA press conferences, press releases, the top trending story on Reddit, with first author research has been in Nature, and covered by a variety of popular news outlets.
